Emad Uddin

Full-Stack & AI Automation Engineer

Laravel · Vue · React · Node.js · Flutter · Claude & OpenAI agents

Full-stack engineer with 6+ years of building SaaS platforms, mobile apps and e-commerce systems, now focused on AI automation: LLM-powered agents that answer email, run social media and take over repetitive business work. Delivered 50+ projects across finance, logistics, healthcare, HR, retail and membership businesses for clients in Bangladesh, the UAE and overseas. Owns products end to end, from database design and APIs to App Store release and cloud deployment.

EXPERIENCE

Freelance Full-Stack & AI Automation Engineer

Ongoing

Independent · Remote

- Built the **TWG Platform** end to end (Laravel 12, Vue.js, Flutter, Passport, Docker): membership, retail, e-commerce, events, raffle and studio modules with four user roles, six integrated Shopify stores, and Staff and Client apps for iOS and Android, including App Store unlisted distribution.
- Built AI agents on the Claude and OpenAI APIs: an email agent that classifies mail and drafts or sends replies, and a social media agent with one-tap Telegram approvals.
- Set up a Shopify store for a Dubai electronics retailer: 341-product catalog import, collection hierarchy and mega menus.
- Built an Amazon affiliate platform (Laravel 12, Redis, Meilisearch, Playwright) and published Spendly, a finance app, on Google Play.

Full-Stack Developer

Oct 2023 - Present

MonsterClaw Ltd

- Architected multi-tenant SaaS applications in Laravel and Vue.js serving 500+ active users.
- Integrated Stripe billing with idempotent webhook handling; built REST APIs, reporting dashboards and data export.
- Managed DigitalOcean infrastructure with automated deployment pipelines.

Technical Associate

Oct 2022 - Oct 2023

DigiPro Solution Ltd

- Built products combining Laravel APIs, Vue.js / Nuxt front ends and Flutter apps with real-time sync.
- Led QA and release cycles; mentored junior developers on API and component design.

Software Developer

Oct 2021 - Sep 2022

MonsterClaw LLC

- Built Vue.js / Nuxt SPAs on Laravel APIs, client portals and SaaS dashboards for enterprise customers.

WHAT I OFFER

AI agents & automation

Email and support agents, social media automation, LLM features in existing apps, MCP servers

SaaS & web apps

Multi-tenant platforms, billing, dashboards, APIs

Mobile apps

Flutter for iOS and Android, store publishing

E-commerce

Shopify setup, catalogs and API integrations

WORKING STYLE

Written scope before work · weekly staging links · code in the client's own repository · overlap with Gulf and European hours

EXPERIENCE (CONTINUED)

Web & Mobile App Developer

Sep 2019 - Sep 2021

A'qa Technology

- Built Flutter apps with Firebase (Realtime Database, ML Kit, Cloud Messaging) and Google Vision image recognition; built Vue.js and Nuxt web apps.

IT Expert

Apr 2017 - Aug 2019

Development Design & Consultant Ltd

- Managed server configuration, maintenance, security audits, patching and technical support.

AI & AUTOMATION PROJECTS

AI Email Agent

Claude / OpenAI · Node.js

Classifies incoming mail and drafts or sends replies grounded in the business's own docs; sensitive replies wait for approval.

Social Media Agent (SaaS, in development)

Laravel · Vue.js · MCP · Telegram

Posts, images, video and comment replies with per-action approval; users bring their own AI model.

AI Employee (in development)

Claude / GPT APIs · agent runtime

Role-based agents that work through apps, terminals and APIs and report every action to a live dashboard.

Qiccha Studio

React · Remotion · Edge TTS

Story-to-animation platform: write a story, pick characters and voice, get a narrated video.

SELECTED PROJECTS

TrackReward — Affiliate SaaS

Laravel · Vue.js · MySQL · Stripe

Multi-tenant, multi-domain, multi-database platform with coupons, recurring commissions and Shopify / WooCommerce integrations.

10,000+ transactions / month

Hairline — Clinic SaaS

Laravel · Nuxt.js · Stripe

Booking, patient CRM, multi-role dashboards and affiliate payouts for hair-transplant clinics.

BgasNetwork — Fleet Management

Laravel · Vue.js · Firebase · GPS

Live vehicle tracking, fuel monitoring and maintenance scheduling for LPG delivery.

25% faster deliveries

KNSAM — Site Access

Vue.js · Flutter · Biometrics

Telecom site access control with a companion app and biometric checks.

70% less unauthorized entry

EasyInvoiceBuilder

Laravel · Nuxt.js · Stripe

Invoice editor with PDF generation and drag-and-drop templates.

40% faster invoicing

Way of Work — HRMS

Laravel · Vue.js · Flutter

Payroll, attendance, employee records and recruitment on web and mobile.

Shmira / CWSP

Flutter · PHP · Leaflet

Field app with interactive maps and spreadsheet import and export.

RankMonster — SEO Analytics

Laravel · Vue.js · Tailwind

Keyword tracking, backlink monitoring and competitor analysis.
